

ABSTRACT

This project is developed for the college, to view exam schedule through artificial intelligence by chatting with bot. It facilitates to access the schedule information of a particular student in a particular class. Mostly students are facing many problems exam schedule information. This project gives the idea about the Exam Schedule. Based on the students and teachers, the bot provides the details of exam schedule for students and teachers to chat with this bot to view the exam schedule. The developer system is evaluated using real data by prospective users of the system. If the details are wrong, the students and teachers will not get their answer. Then the bot issues the, details of details of student's name, paper code, exam date, exam time and location. The bot will give the output for students and teachers.
